They are Finished in Nickel Plate, and retail at
the following prices.

REVISED LIST.—January 1, 1894.

Size Valve,	-	$\frac{1}{2}$	$\frac{3}{4}$	1	$1\frac{1}{4}$	$1\frac{1}{2}$	2
PRICE,		.12	.14	.16	.20	.30	.45

Discounts to the trade and to large consumers.

The Wire Valve Wheels never get HOT, like iron; never warp and split off like wood. The combination of the coiled wire and the hub plates is such that it gives a strong, rigid wheel, a good grasping surface for wet or greasy hands, and presents a pleasing appearance to the eye. They are handsomely finished in Nickel Plate and fit all sizes and makes of valves, &c.

Pat. Dec. 27, 1892.
